

C&D Assembly, Inc.

ISO 9001:2008 ◀ ITAR Registered

CORE CAPABILITIES

- Rapid prototype assembly
- High mix production
- Volume production
- Leaded and **RoHS** assembly
- Aqueous chemistry
- No-Clean chemistry
- Multi-layer
- PCBA Repair/refurbishment

Surface Mount Technology (SMT)

- Fine pitch devices & interconnect
- BGA, QFP, DFN, Odd Form
- Single /double sided
- High density/complex
- multi-layer

Thru-hole assembly (THT / PHT)

- Automated, semi-auto, manual
- Axial component sequencing
- Lead & Lead-free Wave solder
- Fully Automated selective solder
- Manual solder

Test

- Functional Product test
- Go No-go product test
- Device programming
on board & stand-alone

Box build

- Sub assembly / system assembly
- Mechanical assembly
- Product integration
- Complete materials sourcing
- Finished goods
- Dock to stock

Electronics Contract Manufacturing - Since 1992

Experience

C&D Assembly, Inc. has been a leading domestic Electronics Contract Manufacturer for over 20 years. We specialize in rapid-prototype and low to mid volume high-mix production requirements. Our dynamic manufacturing model enables us to accommodate the changing demands of a high-mix environment, while maintaining the ability to provide larger production runs. Core manufacturing services include: automated Surface Mount (SMT) Assembly, automated & manual Thru-hole (THT / PTH) Assembly, Mixed Technology assembly, Box Build, and complete Functional Testing. We also work directly with customer Product & Design Engineers to assist on product improvement, cost savings, and provide DFM recommendations.

A Reliable Strategic Partner

To our customers, we are more than just a supplier. We interact as a strategic partner, providing a reliable and integral element to their success. Since 1992, we have earned a reputation for **quality, dependability, flexibility, and versatility**. The result of these attributes has enabled us to exceed customer expectations, resulting in very high customer satisfaction. We not only work for you, we work with you.

Customer Service

One of the many keys to our success is our customer service philosophy: *We treat you as we would expect to be treated.* Our customers have a single contact at our facility that works with them directly on quotations, new order confirmation, and current order status.

Competitive Advantages

Using our services benefits your company in several areas:

Cost Reduction:

Utilize our material buying power, efficiency, and manufacturing expertise to keep product cost to a minimum.

Product Quality:

Established electronics assembly processes using modern equipment that are designed to consistently meet industry quality standards. All of our manufacturing personnel are IPC trained specialists.

Materials Sourcing:

We source all materials including: actives, passives, interconnects, PC boards, custom sheet metal, wire & cables, Lexan, & hardware. Long-lead time parts are managed through bonding programs & safety stock to accommodate demand spikes and keep production running on-time.

Increase your business focus:

No capital equipment investment required. Preserve resources and focus on your core production needs.

Speed/time to market benefits:

Prototype through production is seamless using our established material supply chains and optimized manufacturing processes. Reduce overall lead-time from order to dock.
